1. Flexibility in the selection of the text book – a book covering latest strategies of Listening and Speaking
2. Course contents to be modified in view of the latest development in listening and speaking
3. Incorporate more technology tool for improving listening and speaking

C. Course Description (Note: General description in the form used in Bulletin or handbook)

Course Description:

This course aims primarily to train students to develop good and effective speaking and listening skills. They will be trained to speak and listen actively and effectively for different purposes and in different social contexts. A wide range of speaking and listening strategies will be continuously described and emphasised throughout the course. English is a global language and students will be exposed to a variety of native and nonnative English accents. What is more, they will be trained to speak clearly, expressively and intelligibly to a wide range of English speakers and users (of various accents and cultural backgrounds). The course utilizes vast and varied audio and video-taped materials (multimodal materials) taught with a view to integrate listening and speaking with other major language skills (reading and writing). The Videos and audios will particularly help to train students on stress and connected speech features (intonation, assimilation, rhythm, etc.).

Additionally, A wide range of speaking tasks have been designed which engaged the

learners in individual speaking, dialogues in pairs, group discussions and role-play. Focus is also on preparing the students for language proficiency tests such as IELTS and iBT TOEFL tests.

Instructors are required to keep updated and to be context-sensitive, flexible, dynamic and to vary both teaching and evaluation strategies (integrating teaching and testing). Although the *Interactions* series is currently used in the course, this can change or may be supplemented by any other materials (materials selection or collation depends largely on the course philosophy, aims and outcomes).

4. Course Learning Outcomes in NQF Domains of Learning and Alignment with Assessment Methods and Teaching Strategy

On the table below are the five NQF Learning Domains, numbered in the left column.

First, insert the suitable and measurable course learning outcomes required in the appropriate learning domains (see suggestions below the table). **Second**, insert supporting teaching strategies that fit and align with the assessment methods and intended learning outcomes. **Third**, insert appropriate assessment methods that accurately measure and evaluate the learning outcome. Each course learning outcomes, assessment method, and teaching strategy ought to reasonably fit and flow together as an integrated learning and teaching process. (Courses are not required to include learning outcomes from each domain.)
