

The philosophy of this service is to give the chance to all university employees to book some information resources that are borrowed by another library user. Also, it allows users to borrow books in an electronic manner through users' library account. This service will be activated right after finishing mechanization of University libraries such as operations of automatic classifying and cataloging of information resources, and also finishing link process between system of libraries management and university automatic system KOHA that has the data of all University employees, teaching staff and students.

Library users can identify information resources in a particular faculty or in all university libraries through the unified catalog

of university libraries through this
